## EXPERIENCE

### CES

Chennai, TN

Enterprise Software Consultancy, 1500+ employees

**Senior UX Designer** Promoted from UX Designer

Mar 2023 - Present

- Led design strategy for enterprise platforms, internal dashboards, and operational systems across 12+ domains (healthcare, manufacturing, automation, pharma, agriculture, education, logistics) serving 20k+ end-users, driving a 65% increase in user satisfaction scores.
- Built and scaled a proprietary AI design workflow using Claude, Figma AI, and custom prompt pipelines that automates user flow generation, component QA, and WCAG 2.2 accessibility audits, reducing design iteration cycles by 3x across all active projects.
- Owned a cross-platform design system (85+ components, 360+ design tokens), cutting component design time by 20% and enforcing visual design consistency across web, iOS, and Android.
- Drove stakeholder alignment with product managers and engineering leads through Agile and Scrum ceremonies, mapping OKRs to UX outcomes and earning 100% CSAT across 6 quarters spanning multiple projects.
- Mentored 6 junior designers (direct reports) on user research methods, design thinking, design critique, and client communication.
- Led cross-functional collaboration with marketing and engineering on POCs, competitive analysis for new product opportunities, and UX onboarding for incoming projects. Championed responsive design and accessibility (WCAG 2.2) across all deliverables.

### UX Designer

Jul 2022 - Mar 2023

- Designed B2B and consumer-facing applications (mobile and web) across 25+ projects, improving usability and adoption through user-centered design, A/B testing, and iterative prototyping.
- Ran usability testing, user interviews, heuristic evaluations, and journey mapping using Hotjar and Maze, translating findings into data-informed design decisions that reduced user onboarding drop-offs by 12%.
- Built information architecture diagrams and onboarding flows for complex enterprise workflows, applying design thinking to simplify multi-step processes into intuitive experiences.
- Partnered with front-end engineers via Figma Dev Mode to ensure pixel-perfect handoff and design fidelity across iOS, Android, and web.
